1995

Salinity data collected by K. Ludwig and Rita Byrd of the U.S. Geological Survey between 9-10 April 1998. Data provided by the National Park Service, Everglades National Park was collected at monitoring stations between xxx April 1998. Data provided by South Florida Water Management District was collected by the Southeast Environmental Research Program of Florida International University on xxx April 1998. Salinity is calculated using Unesco algorithms from conductivity and temperature field measurements. Contours are based on interpolation and trends within the data set, developed and smoothed using contouring software. This map has not been reviewed for conformity with U.S. Geological Survey editorial standards.
